Lay the first board. Place the flat angle brackets on the four corners. Attach the second board, the one with the small window.

Place two flat angle brackets on the first board, like on the image.

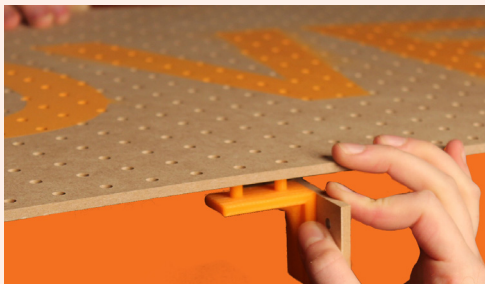

Attach the third board, the one with the big window.

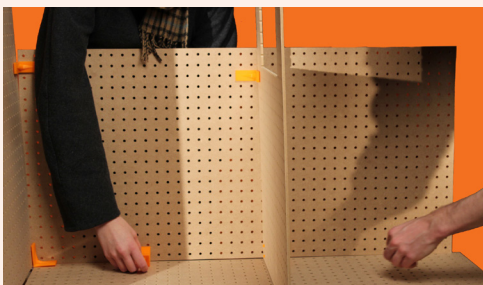

Place two flat angle brackets on the other side of the third board.

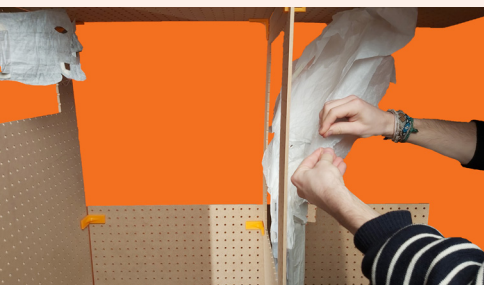

The « MOVE » board goes on the top of the structure.

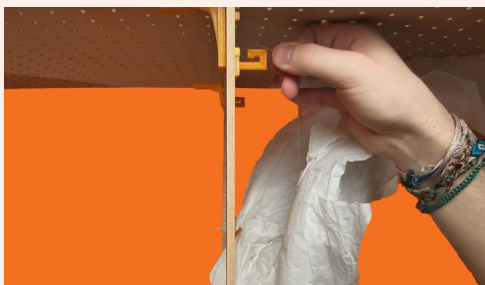

Fix it with flat angle brackets to the third board.

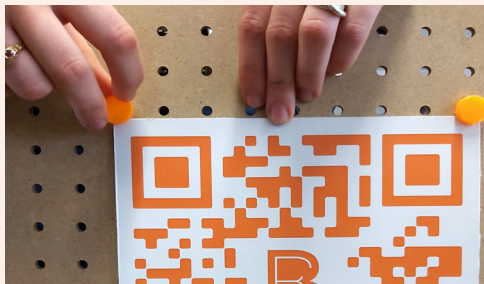

Place the fifth board like on the image.

Place the masks like on the picture: the smaller one in front of the small window, the bigger one in front of the big window.

Hang the masks on the hooks with some transparent thread.

Use the plastic nails to attach the flashcode to the side of the board.
